

ISPE TRAINING COURSES AT YOUR LOCATION

INTRODUCTION TO PHARMACOEPIDEMIOLOGY & DRUG SAFETY

An intensive, interactive, one-day workshop on common methodologies & techniques used in pharmacoepidemiological research.

Course description: Specifically designed for persons who are new to pharmacoepidemiology, therapeutic risk management and drug safety. A proven, practical introduction to this important discipline. Participants will work in teams on case studies and will present the results to other participants.

Who should attend: Anyone new to the field that is involved with the interpretation, critical appraisal and dissemination of pharmacoepidemiological studies and research findings. Work settings include pharmaceutical companies, government, academia, contract research organizations, legal firms, and media/public relations firms.

INTRODUCTION TO THERAPEUTIC RISK MANAGEMENT

Planning and evaluating the effectiveness of risk management programs.

Course description: The course is designed to meet the following objectives:

- Provide an overview of therapeutic risk management tailored to professionals in pharmacoepidemiology, pharmacovigilance, regulatory, and risk communication;
- Present requirements of risk management plans, with emphasis on systematic assessments of risk and the effectiveness of risk minimization interventions;
- Demonstrate methods of program evaluation, including Failure Mode and Effect Analysis;
- Afford an opportunity to explore risk management planning in more depth through a problem-solving workshop tailored to meet the needs of the on-site organization.

Who should attend: Anyone working in the fields of pharmacoepidemiology, pharmacovigilance, drug utilization review, regulatory affairs, outcomes research and risk communication and who are likely to be involved in products under special scrutiny due to safety concerns. Work settings include pharmaceutical companies, government, academia, contract research organizations, legal firms, and media/public relations firms.

FACULTY

Courses are taught by senior-level pharmacoepidemiologists – most of whom are Fellows of the International Society of Pharmacoepidemiology (FISPE).

WHERE CAN THE COURSE BE OFFERED:

At a location of your choice — conference center, university, hotel, or corporate conference room. ISPE faculty are available to teach this course in North America, Europe and Asia/Pacific Rim.
