Attendees:	Morgan Marks, Janet Hardy, James Stark, Piku Patnaik, Wan-Ting Huang, Victoria Abbing, Daniel Weibel, Tamar Lasky, Vera Frajzyngier, Catherine Cohet, Katherine Yih, Jerome Wilson, Trish Lese, Ousseny Zerbo
Discussion	
<p>1. Discussion of ISPE-wide Webinar</p> <ul style="list-style-type: none"> ○ There was a discussion about the utility of the VAXSIG sponsoring an ISPE-wide webinar. Other SIGs have done this. ○ Colleagues generally thought it was a good idea however there were caveats as to the utility and resources required to sponsor the event. In terms of utility, increasing visibility of the VAXSIG could be useful for the general community and also to raise our profile at subsequent ICPE meetings. Providing an opportunity to share methodologies in contrast with other drug-specific methodologies could be of value to ISPE. The resources necessary to sponsor a webinar could be substantial and without a clear objective, it's difficult to commit right now. ○ Topics ranged from a general instruction, specific methodologies, vaccine effectiveness, vaccine hesitancy, vaccine literacy and a focus on stakeholder engagement. ○ The group agreed to further discuss at ICPE Prague and come to a final decision in early fall. <p>2. Next Meeting:</p> <ul style="list-style-type: none"> ○ July 11, 11 am EST ○ Presentation: Steven Black, MD – Development of a Global Vaccine Safety Datalink
