

Overview of content to be requested from ISPE members and groups

The newsletter would like to highlight the following types of content:

- **Conference & Event Highlights:** Recapping recent ISPE conferences and previewing upcoming events relevant to our members.
- **Featured Research Articles:** Highlighting recent peer-reviewed publications in pharmacoepidemiology, summarizing key findings, and providing links to full articles. This section will rely on valuable contributions from our members.
- **Member Spotlights:** Profiling distinguished ISPE members, sharing their contributions to the field, career journeys, and involvement with our society.
- **Policy & Advocacy Updates:** Keeping you informed about legislative and regulatory developments affecting pharmacoepidemiology, and ISPE's efforts to promote evidence-based healthcare policies.
- **Research Methodologies Corner:** Offering tips, best practices, and discussions on innovative methodologies and tools for conducting pharmacoepidemiological research.

***note**, there will be a Membership Corner within all newsletters to engage ISPE members on the benefits of ISPE membership (i.e. mentorship program)

Comments from meeting

Ideas for content

- Promoting the Councils
Suggestion - Student Corner at every (other) newsletter.
As there are four Councils, different Council to be showcased in a general.
- Presidential Remarks
Aim to have in every newsletter
- Strengthening the collaboration with PD.
Spotlights of associate editors of PDS. PDS has special sections (i.e. database profiling) -> could highlight specific sections.
Focus - October edition of newsletter -> LatAm focus (align with LatAm RIG event)
