ICPE 2019 Exhibitors & Sponsors

ISPE gratefully acknowledges the generous support of the following organizations, institutions and programs.

Their contributions helped the Society advance the scientific program content and increase attendance at ISPE's 35th annual meeting (ICPE).

Exhibitors*

- Aarhus University, Department of Clinical Epidemiology
- Advera Health Analytics, Inc
- Aetion, Inc.
- Amgen, Inc.
- Analysis Group
- BHE
- Clinical Practice Research Datalink
- Commonwealth Informatics
- Drug Safety Research Unit
- Eu2P
- Evidera
- FDA/Division of Epidemiology
- FDA/Office of Women's Health
- HealthCore, Inc.
- IBM Watson Health
- ICON plc
- IQVIA
- Kantar

Effective Risk Management: Best Practices for Designing, Implementing and Evaluating Risk Minimization Programs

201A

Content

This course presents an overview of risk management principles, with a focus on best practice methods for designing, implementing and evaluating risk minimization programs. The didactic section will feature experts from regulatory, industry, academia and research organizations who will present the regulatory context, methods, and examples of effective risk minimization program design, implementation and evaluation techniques. The interactive workshop section will provide an opportunity for participants to actively apply what they have learned via a case study approach.

Adherence to Medication

201B

Content

Adherence to medication is indispensable for achieving clinical goals. Non-adherence is a complex and multifactorial problem leading to poor clinical outcomes, increased morbidity and death rates, and unnecessary healthcare costs. Assessing (non-)adherence is challenging and both subjective and objective measures are applied. This course is aimed at introducing students to the various constructs of adherence behavior and techniques to evaluate (non-) adherence and data analysis.

Generating **REAL-WORLD INSIGHT** into Drug Safety & Epidemiology

HealthCore combines proven epidemiology research expertise with one of the largest integrated research environments to uncover vital evidence on the safety and effectiveness of medications and devices in large, real-world populations.

Post-Marketing Requirements/ Post-Authorization Safety Studies

HealthCore designs and manages safety studies as the sole data partner and as coordinating center for studies requiring multiple databases. As an original Sentinel data partner, our intimate understanding of the development and use of electronic real-world data allows us to fulfill industry needs and regulatory requirements accurately and efficiently.

Validation Studies and Machine Learning

Our researchers leverage the **HealthCore Integrated Research Environment (HIRE®)** to validate clinical endpoints by linking administrative claims data to medical records, the National Death Index, and other data sources. We use machine learning methods to develop predictive models that target health conditions of interest with greater validity.

ISPE Newcomers/Early Stage Investigator Pharmacoepidemiology Workshop

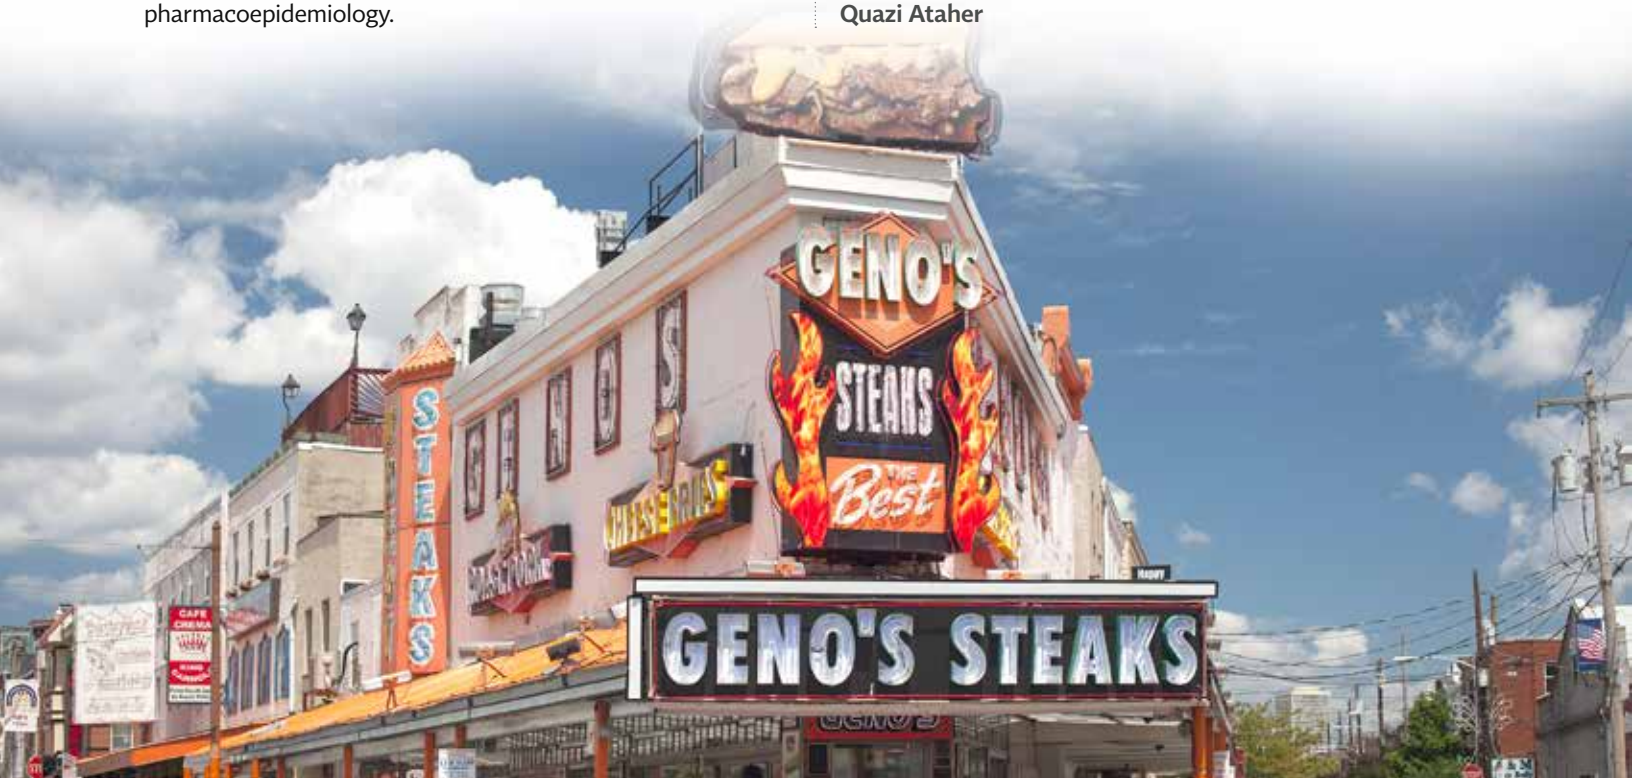

204A

Content

This course is aimed at early stage pharmacoepidemiologists that have been in the field for less than 3 years. Participation will lead to enhancement in research skills (i.e., grant writing, research presentation, and manuscript writing) and professional development (development of mentor-mentee relationships, enhancing creativity/productivity, and professional networking) that are crucial to early success in pharmacoepidemiology.

- Background on biologics, biosimilars and differences from small molecules
- Naming and traceability issues for biologicals and biosimilars
- Interchangeability, switching, and automatic substitution from a regulatory, methodological, and clinical perspective
- Review country-specific regulatory guidelines, particularly focused on post-marketing monitoring, pharmacovigilance, and risk management requirements for biologics and biosimilars
- Conducting observational studies of biologics and biosimilars, including primary data collection and secondary use of data sources for evaluating patterns of use as well as comparative safety and effectiveness of biologics and biosimilars
- Special emphasis will be given to the methodological issues concerning post-marketing assessment of the interchangeability of biologics and corresponding biosimilars

Rare Disease Epidemiology and Orphan Drug Approvals

204C

Content

There are over 7,000 rare diseases, which affect more than 350 million people worldwide, only 5% of rare conditions have an FDA approved drug treatment. Over the past years, an increasing number of companies have devoted clinical programs to develop new treatments for patients with rare disorders. This creates the need for rare disease epidemiology, as a sub-specialty within pharmacoepidemiology. This unit is aimed at introducing students to the current regulatory environments for rare disease drug approvals in the US and Europe, the specific methodologic issues arising in rare disease epidemiology, use of electronic medical records and claims databases for rare disease research, as well as practical approaches used to integrate pharmacoepidemiologic methods into rare disease drug development programs.

Using Field Studies to Value-Add in Pharmacoepidemiology

201A

Content

This course provides basic theory and practical tips in conducting pharmacoepidemiologic studies when required information is not captured in databases or when large databases are not available. Common study designs used to collect data through observations, medical records or questionnaires will be presented and the strengths and limitations of working without large databases discussed. Hands-on experience via a workshop will expose course participants to different study designs and rich discussions on how to answer relevant questions about safety and utilization of medicines in primary and secondary care settings using field studies.

EDUCATIONAL SESSIONS: HALF-DAY AFTERNOON COURSES (Ticket Required) (continued)**Comparative Effectiveness Research (CER)**

201C

Content

There is growing interest in drug repurposing, which involves finding new uses for old drugs. In addition to various clinical and pharmacological approaches, the methods of comparative effectiveness research (CER) can play an important role in evaluating whether marketed medications may be beneficial for other indications before embarking on large and expensive randomized trials. The course will start with an overview of the role of CER in drug repurposing, describe CER methods for generating evidence to evaluate the benefits of existing medications for new indications, and will discuss the promises and challenges of CER in this space. Multiple case studies will be used to facilitate an interactive group discussion and will address how observational, real-world data can be used to evaluate medications for repurposing.

CHECK OUT YOUR NEWEST MEMBER BENEFIT - The ISPE Exchange

Welcome to The ISPE Exchange, ISPE's new online community. It is your newest, best way to connect with members, get involved with the Society, join the mentorship program, and connect with new people.

Plan on joining some ISPE communities. Communities allow you to participate in discussions and share resources with other members. ISPE Committees, Special Regional Interest Groups, Councils and Chapters all have communities on the Exchange.

Log-in today at community.pharmacoepi.org

Below are several basic question and responses.

Q: WHAT IS MY USERNAME/PASSWORD?

A: Your login credentials are the same username and password that you use to log in to the main site. If you have forgotten your login credentials or need assistance with your login information, Email: info@pharmacoepi.org

Q: HOW DO I JOIN/SUBSCRIBE TO A COMMUNITY AND THE AFFILIATED DISCUSSION GROUP?

A: Click on "Communities" in the main navigation and click on "All Communities" in order to see a list of available communities. Click on the community that you wish to join and simply click "Join," then choose a delivery option for posts (Real Time, Daily Digest or No Email).

Q: HOW DO I START A NEW DISCUSSION THREAD?

A: Go to "Participate" > "Post a message." From an email (HTML version) for a particular discussion forum, you can use the "Post Message" link located at the top of the discussion email.

Q: HOW DO I FIND RESOURCES THAT MAY HAVE BEEN UPLOADED BY OTHER MEMBERS?

A: If you know which library the resource might be located in, find the affiliated community via the All Communities page. Click through the community's landing page, then click on the "Library" tab. If you do not know where the resource might be, enter search terms in the main search box the same way you might enter search terms in Google or another search engine.

Practical Skills in Protocol Writing and Statistical Analytic Programming Relevant to Pharmacoepidemiology

204A

Content

Pharmacoepidemiologic studies that involve the use of electronic healthcare data have complex and unique characteristics that must be taken into consideration when planning and conducting these types of studies. This highly interactive course will engage participants in the following topics:

- Pre-specifying study components of a protocol, including design, analysis, and reporting of the study, along with a science-based rationale for the choices pertaining to these components
- Translating elements of the study protocol into a statistical analytic program.

EDUCATIONAL SESSIONS: HALF-DAY AFTERNOON COURSES (Ticket Required) (continued)**Scientific Writing from the Reader's Perspective: A New Take on the Writing Process**

204B

Content

From graduate students to senior practicing pharmacoepidemiologists, our work requires that we communicate in writing. Success in securing funding, sharing research findings, and influencing key decision makers depends on the skill with which we present thoughts to the reader. Those accustomed to reading English prose bring implicit expectations for when and how information will be presented. Violate these unstated expectations and the reader becomes irritated, weary, and struggles to understand the writer's intended message. The same content presented in alignment with reader expectations allows the reader to focus on the writer's ideas.

Over the last 45 years, Dr Gopen has devoted himself to uncovering these reader expectations and understanding the implications for scientific writing. During that time, he has taught tens of thousands of undergraduates, PhDs, MDs, JDs and MBAs the world over – including many mid-to-senior level clinical scientists. In this workshop, Dr Gopen introduces participants to the rhetorical principles underlying this advanced approach to scientific writing and demonstrates key reader expectations well enough for them to be applied immediately.

As noted in Dr. Gopen's 1990 publication in American Scientist, "The results are substantive, not merely cosmetic: Improving the quality of writing actually improves the quality of thought."

Pragmatic Trials: Design, Methods, and Implementation

202AB

Content

Pragmatic randomized clinical trials (pRCTs) require the expertise of pharmacoepidemiologists that understand considerations and methodologic challenges that arise with more "pragmatic" RCTs compared with traditional "explanatory" RCTs. This course will highlight issues such as real-world site and patient identification, enrollment and retention, ethical review issues, approach to randomization, selection bias, and defining the appropriate comparator. In addition, choice of study design including cluster randomization, step wedge design or individual randomization, and associated analytic considerations will be highlighted. Randomizing patients to "standard of care (SOC)", accounting for changes in therapies over time, and other methodological considerations will also be discussed. Operational challenges and lessons learned from conducting pRCTs will be shared along with case examples.

Content

Pharmacoepidemiology requires the utilization of database resources to evaluate drug safety. This course will define the different types of data resources available for pharmacoepidemiology and the selection criteria to select the most appropriate resource. The course focuses on the Guidelines for good database selection and use in pharmacoepidemiology research, provides an overview of available resources, addresses the need for outcome validation, and highlights data linkage considerations.

TRANSFORMING THE LANGUAGE OF LIFE INTO VITAL MEDICINES

At Amgen, we believe that the answers to medicine's most pressing questions are written in the language of our DNA. As pioneers in biotechnology, we use our deep understanding of that language to create vital medicines that address the unmet needs of patients fighting serious illness—to dramatically improve their lives.

For more information about Amgen, our pioneering science and our vital medicines, please visit www.amgen.com

Amgen is a proud sponsor of the 35th International Conference on Pharmacoepidemiology and Therapeutic Risk Management. Epidemiologic research at Amgen focuses on benefiting patients with grievous illnesses and advancing knowledge in our field.

Epidemiology of Vaccine Safety

201B

Content

Vaccines are key tools for global public health. Increasingly, pharmacoepidemiological studies are providing critical evidence needed for risk-benefit assessment to inform immunization policy, both for mature immunization programs and for low- and middle-income countries (LMIC) for which innovative vaccines against challenging diseases (e.g., dengue fever, Ebola, malaria, etc.) are under development. The annual ICPE has had vaccine-specific sessions for >15 years and ISPE has had a Vaccine Special Interest Group (VAXSIG) since 2014. One of the VAXSIG goals is to offer educational activities on vaccine-related epidemiology, in collaboration with the ISPE Education Committee.

Content

This educational session provides an overview of drug utilization research (DUR) and presents essential methods used. The session includes interaction with participants, question and answer sessions, and discussion during and at the end of each presentation. At the end of the session, the participant will be exposed to:

- Description of the theoretical framework and practical applications of different methods illustrated using selected examples
- Classification systems used in drug utilization monitoring and research
- Limitations of data sources and methods
- Interpretation of aggregate and individual-based data, variation and change
- Using drug utilization research for public health and implications for policy decisions

Modern Pregnancy Pharmacoepidemiology: Selected Analytical Considerations in the Study of Drug Safety in Pregnancy

204A

Content

In this course, faculty will present and discuss selected analytical considerations that are relevant for drug safety research in pregnancy.

The content of this course has changed from previous years. In 2015, the course provided an overview of issues that are particular to drug safety research in pregnancy. In 2016, the course focused on challenges related to exposure measurement, in 2017 the focus was on maternal and neonatal outcomes, and in 2018, the course presented pros and cons of various study designs. This year, the focus will be on selected analytical aspects of relevance to pregnancy safety research.

Content

This course will introduce participants to the principles of surveillance in pharmacovigilance with a focus on quantitative aspects and recent advances in the field. The course will cover classical pharmacovigilance signal detection using spontaneous adverse event reports, quantitative signal detection methods for electronic medical record and claims data, and international initiatives, including work in the US FDA's Sentinel program aimed at using routinely collected electronic healthcare data to conduct signal detection. Real-world examples will be used across the lecture sessions to illustrate and connect different concepts. Participants will engage in interactive discussions about contemporary issues in and challenges facing pharmacovigilance, such as the role of social media data and the use of the same data for both signal detection and subsequent evaluation.

Content

This course will provide an overview of the methods and applications for studies that use primary data collection for effectiveness and safety research, including regulatory submissions of real-world data for label approvals or expansions. Topics include data collection from clinicians, electronic health records, or directly from patients without use of clinicians, and will address methodological and logistical challenges with a focus on recruitment and retention. Examples will include working with patient communities, data collection through clinicians, call centers, and digital technologies, and integrating electronic health data, with applications in rheumatology, pregnancy and injury research, among others.

Advanced Pharmacoepidemiology

201A

Content

This interactive course will touch on multiple advanced pharmacoepidemiology methods with each lecture providing the necessary tools for the attendees to apply the discussed principles to their own research.

- Multi-group Comparisons
- Drug-drug Interaction Research
- Double Robustness
- Conditional Power

Applied Sensitivity Analyses in Pharmacoepidemiology Database Studies

201B

Content

It is widely recognized that sensitivity analyses of study design choices and analytic assumptions help to interpret the robustness of pharmacoepidemiology studies. To encourage increased use of well-described techniques, this workshop will provide an introduction and demonstrations of a range of sensitivity analyses typically applied in pharmacoepidemiology with hands-on exercises. The course is interactive and participants will be able to conduct their own sensitivity analyses during the course – **bring your computer!**

Part 1: Sensitivity analyses of study design choices will introduce typical variations in study designs, including variations in exposure risk window length, variations in covariate assessment window length, duration of minimum induction period, and variations in follow-up model (fixed time vs. as treated analysis).

Part 2: Quantitative confounding bias analysis will focus on testing the influence of external assumptions or outside data on our understanding of residual confounding in a specific study setting.

KANTAR

DELIVERING REAL-WORLD EVIDENCE THAT KEEPS PATIENTS SAFE

Partnering with prescribers and key industry stakeholders, we develop international registries that meet real-world evidence needs and provide hybrid studies that go beyond the database.

Through a custom consulting engagement, we'll fully support your regulatory needs.

Our vast heritage consists of more than 20 years of experience in real-world, patient-centric PASS and PAES, and our team has developed innovative safety studies for AI influenced devices and medicines.

EDUCATIONAL SESSIONS: HALF-DAY AFTERNOON COURSES (Ticket Required) (continued)**Advanced Drug Utilization Research**

201C

Content

This interactive educational program includes presentations, question and answer sessions and a final discussion with the faculty panel. The session will involve participants in the:

- Methods for evaluating the effect of clinical or policy interventions
- Interpretation of the evaluation data and dissemination of results
- Application of principles derived from Health Services and Implementation Research to the design of a clinical intervention
- Use of drug utilization information from administrative health data to improve medicines use
- Use of prescribing data and quality measures to assess prescribing

Medical Device Epidemiology

204A

Content

Over the past few years, there has been increased focus on generating real-world evidence for medical products. Thus, medical product epidemiology is gaining visibility outside of ISPE. Medical device epidemiology uses methodologies similar to those for medicines. However, alternative strategies are often implemented due to the nature of the products, data sources, and situational use. With the changing regulatory and reimbursement environments, it is more important than ever for pharmacoepidemiology researchers to better understand the methods and practice of medical device epidemiology, both for study of medical devices and combination products. Methods discussed will be applicable across therapeutic products and will provide deeper understanding of measuring benefits and risks in clinical context.

This course provides a foundation for medical device epidemiology and its current applications in actual clinical practice. The session will incorporate didactic lectures and interactive case studies that highlight novel medical devices and combination products.

Pediatric Pharmacoepidemiology

204B

Content

The increasing use of medications by children and the history of excluding children from clinical trials have created the need for pediatric pharmacoepidemiology, a sub-specialty within pharmacoepidemiology. Unique challenges in studying children, accessing data, defining outcomes, and designing pediatric studies will be discussed. This course will introduce participants that have a good understanding of pharmacoepidemiology to the specific methodologic issues arising in pediatric pharmacoepidemiology and operational approaches used to study medications in children.

Regulatory Pharmacoepidemiology

202AB

Content

Medical product regulation increasingly relies on pharmacoepidemiologic analyses to assess the safety of medical products once they are marketed. This course is aimed at describing how pharmacoepidemiologic analyses are used in regulatory decision making, and the challenges that regulators face when using such analyses.

Weighing the Benefits & Risks: The Science and Methods of Benefit-Risk Assessment in Drug Development

204 C

Content

Benefit-risk assessment is now a fundamental science for understanding and evaluating the development, approval, and continued marketing of drugs and devices. This course is aimed at introducing attendees to core concepts and tools of both the science and practice of benefit-risk assessment.

Keynote Session - The Role of Real World Evidence In Regulatory Decision Making Ballroom B

With the 21st Century Cures Act, U.S. Congress directed the FDA to explore how real-world evidence (RWE) can be used to support approval of new indications for existing drugs and to satisfy post-approval study requirements. To address this mandate, FDA committed to conducting pilot studies and developing guidance on how RWE can contribute to the assessment of safety and effectiveness in regulatory submissions. In this keynote address, the FDA speaker will discuss the current application of RWE in regulatory decision making, the development of evidence to support fitness for use, future directions, and the role of pharmacoepidemiology in the generation and evaluation of RWE. A panel of pharmacoepidemiologists will provide their own perspectives on the promises and challenges of using RWE to assess the safety and effectiveness of drugs and biologics.

Working together for a healthier world

Committed to bringing therapies to people that extend and significantly improve their lives

At Pfizer, we apply science and our global resources to bring therapies to people that extend and significantly improve their lives. We strive to set the standard for quality, safety and value in the discovery, development and manufacture of health care products. Our global portfolio includes medicines and vaccines as well as many of the world's best-known consumer health care products. Every day, Pfizer colleagues work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time. Consistent with our responsibility as one of the world's premier innovative biopharmaceutical companies, we collaborate with health care providers, governments and local communities to support and expand access to reliable, affordable health care around the world. For more than 150 years, Pfizer has worked to make a difference for all who rely on us.

PLENARY SESSION: IMPLEMENTATION AND EVALUATION OF RISK MINIMIZATION MEASURES: CHALLENGES AND OPPORTUNITIES BALLROOM B

In parallel with the global adoption of risk management planning, significant progress has been made in recent years in the area of risk minimization measures and evaluation of their effectiveness. Experts in the field now fully recognize the importance of integrating risk minimization and effectiveness as part of the evaluation of the benefit-risk profile throughout the therapeutic product lifecycle in order to ensure that better safety outcomes are met for the patient. However adoption of such measures has also been accompanied with certain challenges. Examples include how to harmonize the risk minimization programs with regional or country-specific requirements, when should effectiveness be evaluated and what is an acceptable threshold for success. In addition, more and more, it is recognized that evaluation of effectiveness should occur throughout the life cycle of a therapeutic product, and information is to be collected in real-world settings. This information in turn will inform on whether changes are needed to the product label or other terms of marketing, including removal of regulatory requirements.

Considering that 2019 coincides with the 10th anniversary of the global adoption of risk management planning worldwide (i.e., ICH E2E), the speakers will provide their perspective supported with case examples to illustrate real-world challenges and proposed solutions. These talks will

be followed with a moderated discussion with the audience and a podium discussion with the panelists to generate a discussion and ultimately share best practices that can be used in risk management planning.

How to Analyze Complex Longitudinal Exposures

201C

Moderators: Daniel Prieto-Alhambra, FISPE, & Mollie Wood

1:00pm

Methods to Account for Time-Varying Medication Use When Developing a Model for Patient Prognosis [471]

Romin Pajouheshnia, Noah Schuster, Rolf Groenwold, Linda Peelen. (Netherlands)

1:15pm

Using the Reverse Waiting Time Distribution with Random Index Dates to Estimate Prescription Durations with Seasonal Variation [472]

Katrine Bødkergaard Nielsen, Randi Marie Selmer, Jesper Hallas, Lars Jøran Kjerpeseth, Anton Pottegård, Eva Skovlund, Henrik Støvring. (Denmark)

1:30pm

Exploring Longitudinal Trajectories to Model Paternal Exposure in Evaluating Risk of Adverse Outcomes in Their Offspring [473]

Minna Vehkala, Ruben Hermans, Silvia Narduzzi, Deborah Layton. (United Kingdom)

1:45pm

Using Machine Learning Algorithms to Predict Medication Initiations and Discontinuations [474]

Hoa V Le, Chi Truong. (United States)

2:00pm

Assessing Differences in Treatment Effects: Interactions with Propensity Score Splines [475]

David J Graham, Jiemin Liao, Elande Baro, Rongmei Zhang, Michael Wernecke, Yuqin Wei, Mao Hu, Sandia Akhtar, Thomas E MaCurdy, Jeffrey A Kelman, Frank E Harrell. (United States)

2:15pm

A Challenge of Real World Data: How to Assign Individuals to a Treatment Strategy When Their Data Are Consistent with Several Treatment Strategies at Baseline [476]

Xabier Garcia de Albeniz, John Hsu, Miguel A Hernan. (Spain)

Validity of RWE Data in Pregnancy

202AB

Moderators: Vera Ehrenstein & Gretchen Bandoli

1:00pm

Development and Validation of Algorithms to Estimate Live Birth Gestational Age in Medicaid Analytic Extract Data [477]

Yanmin Zhu, Thuy N Thai, Brian T Bateman, Sonia Hernandez-Diaz, Jessica M Franklin, Loreen Straub, Almut G Winterstein, Kathryn J Gray, Yandong Qiang, Wei Hua, Lockwood G Taylor, Krista F Huybrechts. (United States)

1:15pm

Utility of Prenatal Tests to Estimate Pregnancy Start in Sentinel [478]

Lockwood G Taylor, Steven T Bird, Danijela Stojanovic, Sengwee Toh, Elnara Fazio-Eynullayeva, Andrew Petrone, Jennifer G Lyons. (United States)

1:30pm

Estimation of the Beginning of Pregnancies Ending in Stillbirths [479]

Tania Schink, Ulrike Haug. (Germany)

1:45pm

Validation of ICD-9-CM Coding Algorithms to Identify Non-Live Birth Outcomes in an Automated Database [480]

Yanmin Zhu, Kathryn Gray, Brian T Bateman, Sonia Hernandez-Diaz, Loreen Straub, Rebecca M Reimers, Beryl Manning-Geist, Elizabeth Yoselevsky, Yandong Qiang, Lockwood G Taylor, Wei Hua, Krista Huybrechts. (United States)

2:00pm

Immortal Time Bias in Comparative Drug Safety Studies in Pregnancy [481]

Kristian B Filion, Colin Dormuth, Pauline Reynier, J. Michael Paterson, Robert W Platt, Samy Suissa. (Canada)

2:15pm

Comparing the Use of Propensity and Disease Risk Scores in Signal Detection for Prematurity on Medico-Administrative Database [482]

Romain Demailly, Sylvie Escolano, Françoise Haramburu, Pascale Tubert-Bitter, Ismail Ahmed. (France)

HOW DO WE USE DATA TO IMPROVE HEALTH CARE,
RIGHT FROM THE BEGINNING?

HOW

WE KNOW HOW. WE ARE THE HOW.

Understanding the impact of medication interventions during pregnancy can improve the health and well-being of women and babies. That's the purpose of the Optum® Dynamic Assessment of Pregnancies and Infants (DAPI).

DAPI leverages claims and electronic health record (EHR) data to better answer questions of exposure and outcomes regarding pregnancies and infant health.

Learn more about DAPI while at ICPE 2019 — visit us at booth #302–304.

Visit optum.com/epidemiology to explore how Optum Epidemiology is advancing public health through rigorous research and the development of elegant data tools.

Moderators: Douglas Steinke & Susana Perez-Gutthann, FISPE

8:30am
Treatment Patterns of Checkpoint Inhibitors in Metastatic Melanoma [817]

Marina A Machado, Cristiano S Moura, Jeffrey R Curtis, Marie Hudson, Sasha Bernatsky. (Canada)

8:45am
Measuring Treatment Intensification in Patients with Type 2 Diabetes: An Electronic Health Records Based Study [818]
 Robert J Romanelli, Zachary A Marcum, Qiwen Huang, Jakob S Knudsen, Dominick L Frosch. (United States)

9:00am
Trends in Blood Pressure Thresholds for Initiation of Antihypertensive Treatment in Patients with Type 2 Diabetes [819]
 Martina Ambroz, Sieta T deVries, Grigory Sidorenkov, Klaas Hoogenberg, Petra Denig. (Netherlands)

9:15am
Incidence of Direct Oral Anticoagulation Use for Non Valvular Atrial Fibrillation and Characteristics of Users in Six European Countries (2008-2015): A Cross-National Drug Utilization Study [820]
 Luisa Ibanez, Mònica Sabaté, Xavier Vidal, Elena Ballarín, Marietta Rottenkolber, Sven Schmiedl, Andreas Heeke, Consuelo Huerta, Elisa Martin Merino, Dolores Montero, Luz M Leon-Muñoz, Christiane Gasse, Nicholas Moore, Cécile Droz, Régis Lassalle, Mia Aakjaer, Morten Andersen, Marie Louise De Bruin, Rolf Groenwold, Rianne Van den Ham, Patrick Souverein, Olaf Klungel, Helga Gardarsdottir. (Spain)

9:30am
Assessment of the Calcium Channel Blocker, Lower Extremity Edema, Loop Diuretic Prescribing Cascade: A Prescription Sequence Symmetry Analysis [821]
 Scott M Vouri, Xinji Jiang, Carl Pepine, Laurence Solberg, Daniel C. Malone, Almut Winterstein. (United States)

9:45am
Appropriate Prescribing in Nursing Homes Demonstration Project: A Pragmatic, Cluster-Randomized Trial [822]
 Mina Tadrous, Kinwah Fung, Laura Desveaux, Tara Gomes, Monica Taljaard, Noah Ivers. (Canada)

8:30am– 10:00am

CONCURRENT SESSIONS: ORAL PRESENTATIONS (continued)**Validation and Performance - Methods and Pharmacovigilance**

201A

Moderators: Aaron Kamau & Andres Gomez-Camirero

8:30am

Identifying Signals of Warfarin Drug-Drug Interactions: A Translational Biomedical Informatics Approach Using Real World Clinical Evidence [823]

Meijia Zhou, Lei Wang, Charles E. Leonard, Colleen M Brensinger, Warren B Bilker, Stephen E Kimmel, Todd E Hecht, Lang Li, Sean Hennessy. (United States)

8:45am

Drug Safety Signal Detection in a Chinese Regional Healthcare Database Using the Tree-Based Scan Statistic and Comparison to 3 Other Statistical Methods [824]Hailong Li, Lingli Zhang, Siyan Zhan. (China) *Recipient of The Andrew McAfee Award*

9:00am

Contribution of Natural Language Processing in Predicting Risk of Pleural and Pericardial Effusions in Small Cell Lung Cancer by Line of Therapy [825]

Rui Jiang, Ravi Potluri. (United States)

9:15am

Text Mining to Identify Drug-Drug Interactions (DDIS) in Elderly Patients Admitted to Emergency Department [826]

Iris Pujade, Perrine Duthoit, Grégoire Evrard, Alicia Bel-Létoile, Clément Goehrs, Vianney Jouhet, Sébastien Cossin, Antoine Pariente, Frantz Thiessard, Francesco Salvo, Louis Letinier. (France)

9:30am

Nationwide Adverse Drug Reaction Screening Using High Process Computing [827]

Te-yuan Chyou, Prasad S Nishtala. (New Zealand)

9:45am

Detecting Rare Diseases: A Case Study Using Machine Learning Semi-Supervised Networks to Identify Under-Diagnosed Patients [828]

Yunlong Wang, Christina Mack, Fan Zhang, Yong Cai, Emily Zhao. (United States)

Revolutionary Study Designs

201B

Moderators: Nicolle Gatto, FISPE, & Tobias Gerhard, FISPE

8:30am

Evaluation of Bias in Case-Crossover Analyses of Persistent Drug Exposures [829]

Katsiaryna Bykov, Shirley V Wang, Joshua J Gagne. (United States)

8:45am

Empirical Assessment of Case-Based Methods for the Identification of Drug-Related Health Outcome of Interest in the French Nationwide Healthcare Database (SNDS) [830]

Nicolas Thurin, Régis Lassalle, Patrick Blin, Marine Pénichon, Martijn Schuemie, Joshua J Gagne, Jeremy A Rassen, Jacques Benichou, Alain Weill, Cécile Droz-Perroteau, Nicholas Moore. (France)

9:00am

Using Active Comparators in Self-Controlled Studies [831]

Jesper Hallas, Suzanne Cadarette, Nicole Pratt, Joseph A Delaney, Heather Whitaker, Malcolm Maclure. (Denmark)

9:15am

Development and Application of a Hybrid Matching Algorithm to Refine the Prevalent New-User Cohort Design for Comparative Drug Effect Studies [832]

Chenyi Yang, Shihchen Kuo, Chun-Ting Yang, Edward Chia-Cheng Lai, Huang-Tz Ou. (Taiwan)

9:30am

Classes and Prevalence of Prevalent New Users: An Example in Medicare [833]

Michael Webster-Clark, Til Stürmer, Jessie K Edwards, Ross Simpson, Charles Poole, Jennifer L Lund. (United States)

9:45am

Comparative Performance of Trend-in-Trend Design and Instrumental Variable Methods in an Active Comparator New User Setting [834]

Phyo T Htoo, Michele Jonsson-Funk, Gang Fang, Virginia Pate, John Buse, Jessie K Edwards, Nabarun Dasgupta, Til Stürmer. (United States)

8:30am– 10:00am

CONCURRENT SESSIONS: ORAL PRESENTATIONS (continued)

Infectiously Interesting

201C

Moderators: Jennita Reefhuis & Mette Norgaard

8:30am

Concomitant Use of Quinolones and Stimulants and the Risk of Cardiovascular Adverse Events: A Comparative Safety Study [835]

Adel A. Alrwisan, Yu-Jung Wei, Patrick Antonelli, Babette Brumback, Almut Winterstein. (Saudi Arabia)

8:45am

An Unnecessary Risk: Lack of Benefit of Fluoroquinolone Antibiotics in Uncomplicated Exacerbations of Chronic Obstructive Pulmonary Disease [836]

Pierre Ernst, Matthew Dahl, Dan Chateau, Nick Daneman, Jacqueline Quail, Ingrid S Sketris, Anat Fisher, Jianguo Zhang, Shawn Bugden, for the CNODES Investigators. (Canada)

9:00am

Excess Risk of Tendon Rupture Due to Fluoroquinolones with and without Concomitant Corticosteroid Use [837]

Rebecca Persson, Susan Jick. (United States)

9:15am

Early Childhood Antibiotics Use and the Risk of Attention-Deficit/Hyperactivity Disorder: A Population-Based Cohort Study [838]

Amani Hamad, Silvia Alessi-Severini, Salah Mahmud, Marni Brownell, I fan Kuo. (Canada) *Recipient of The Edlavitch Award - Best Abstract Submitted by a Student/Post-Doc*

9:30am

Comparative Safety and Cost Assessment of Prescribing Systemic Steroids for Acute Respiratory Tract Infections [839]

Kueiyu Joshua J Lin, Sebastian Schneeweiss, Evan Dvorin, Mehdi Najafzadeh, Aaron S Kesselheim. (United States)

9:45am

Antibiotic Use and Colorectal Cancer Recurrence and Mortality: A Danish Nationwide Prospective Cohort [840]

Veronika Fedirko, Deirdre Cronin-Fenton, Anders Hammerich Riis, Henrik Toft Sørensen, Timothy L. Lash. (United States)

Do Do Do Doac

202AB

Moderator: John Seeger, FISPE & Hiraku Kumamaru

8:30am

Staying on Treatment Matters: Estimating Effects of Dabigatran vs Warfarin in Medicare [841]

Michael Webster-Clark, Til Stürmer, Charles Poole, Ross Simpson, Jessie K Edwards, Jennifer L Lund. (United States)

8:45am

Comparative Effectiveness and Safety of Concomitant Use of Antiplatelets and Anticoagulants in Acute Coronary Syndrome Patients with Atrial Fibrillation [842]

Ghadeer K Dawwas, Eric Dietrich, David Winchester, Almut Winterstein, Richard Segal, Haesuk Park. (United States)

9:00am

Safety and Effectiveness of Direct Oral Anticoagulants versus Vitamin K Antagonists, Results from Three Italian Regions [843]

Ursula Kirchmayer, Silvia Narduzzi, Flavia Mayer, Marco Tuccori, Olivia Leoni, Valeria Belleudi, Antonio Addis, Marina Davoli. (Italy)

9:15am

Comparative Effectiveness and Safety of Direct Oral Anticoagulants in Non-Valvular Atrial Fibrillation: A Multi-Center Observational Cohort Study [844]

Madeleine Durand, Mireille E Schnitzer, Menglan Pang, Greg Carney, Sherif Eltonsy, Kristian B Filion, Anat Fisher, Min

Jun, I fan Kuo, Alexis Matteau, J Michael Paterson, Jacqueline Quail, Christel Renoux, for the CNODES Investigators. (Canada)

9:30am

Comparative Effectiveness and Safety of Direct Acting Oral Anticoagulants and Warfarin in Cancer Patients with Venous Thromboembolism [845]

Ghadeer K. Dawwas, Eric Dietrich, Kyle Davis, Haesuk Park. (United States)

9:45am

Risk of Major Bleeding Associated with the Use of Individual Direct Oral Anticoagulants Compared to Vitamin K Antagonists in Patients with Non-Valvular Atrial Fibrillation: A Meta-Analysis of Results from Multiple Population-Based Cohort Studies Using a Common Protocol in Europe and Canada [846]

Hendrika van den Ham, Patrick Souverein, Olaf Klungel, Robert Platt, Pierre Ernst, Sophie Dell'Aniello, Sven Schmiedl, Birgit Grave, Marietta Rottenkolber, Consuelo Huerta, Elisa Martin Merino, Luz León-Muñoz, Luz León-Muñoz, Dolores Montero, Morten Andersen, Mia Aakjær, Marieke De Bruin, Helga Gardarsdottir. What science can do

At AstraZeneca, we turn ideas into life changing medicines. Working here means being entrepreneurial, thinking big and working together to make the impossible a reality.

Epidemiologists at AstraZeneca support drug discovery and development as well as commercialisation of pharmaceuticals. Major activities include: critical appraisal and synthesis of relevant epidemiological literature; design, initiation, management, conduct, analysis, and reporting of epidemiological studies, including observational and interventional studies; and development of medical and payer evidence plans to fill critical knowledge gaps, including support to specialised areas (e.g. biomarker development, disease modelling, health economics).

If you are interested in learning more about AstraZeneca, or joining our team, visit www.astrazeneca.com.

Hot Topics Session: When You're a Single-Arm Trial or Extension, Can an External Control Make a Good Match?

Ballroom B

Uncontrolled study arms in Phase II/III trials and long-term trial extensions provide an efficient mechanism to gain efficacy and safety data. They may also avoid ethical issues in the use of long-term placebo, feasibility or cost issues around choice of a relevant, effective and safe comparator, while meeting the need for sufficient exposure data for regulatory filing.

While uncontrolled studies offer benefits, there are also risks. The lack of an internal control group poses challenges to the evaluation and interpretation of any unexpected serious adverse events (SAEs) that may occur. The occurrence of even a small number of SAEs, or otherwise clinically important AEs, may engender enough uncertainty with respect to the risk/benefit profile that, additional data may be required pre-submission, lead to cautionary labeling, or prompt further post-marketing study requirements.

This Hot Topics Session will cover issues related to uncontrolled, pre-authorization product development trials and extensions to randomized controlled trials. The session will propose the use of observational, real world evidence (RWE) patient cohorts as a potential method to provide an external control group for these Phase II/III uncontrolled, clinical trials and/or open-label, long-term extensions that may mitigate some of the risks. The 20-minute presentations and 30-minute discussion will include:

1. scope of the use of single-arm, uncontrolled trials in product development and examples where uncontrolled arms have posed a regulatory review issue;
2. methodologic and analytic challenges of using external control cohorts as comparators for safety and/or effectiveness for uncontrolled trials and/or trial extensions, including types of databases, collection of data, analytic issues and ability to control for confounding; and,
3. challenges in interpreting uncontrolled trial data in regulatory filings and regulatory perspectives on use of real world data as external controls to assist in regulatory decision-marking.

OVERVIEW

Poster sessions are designed to give presenters an opportunity to discuss informally their research with colleagues interested in their research. The purpose of the posters is to visually stimulate interest in the research, to present sufficient information for viewers to understand the methods, results, and significance of the research, and to promote conversations and networking among conference participants.

NOTE

Neither ISPE nor the Pennsylvania Convention Center will be responsible for any material left on display overnight or is lost or damaged.

POSTER SESSIONS

Spotlight Poster Sessions (West Bridge) & General Poster Sessions (Hall A) will be displayed in the Pennsylvania Convention Center. There will be a distinct Spotlight Poster Session and General Poster Session each day. All posters for a specific day's session must be removed at the end of that day.

- Monday, August 26, **Session A** - Spotlight Posters/General Posters
- Tuesday, August 27, **Session B** - Spotlight Posters/General Posters
- Wednesday, August 28, **Session C** - Spotlight Posters/General Posters

1. SET UP

7:00am-8:00am; all posters must be in place by 8:00am. The poster area (including floor) must remain clear and clean of tubes.

2. HOURS

Posters will be displayed from 8:00am-5:00pm on Monday and Tuesday, and 8:00am-1:15pm on Wednesday.

3. DISCUSSION TIME

General: Presenters should be at their posters between 12:15pm-1:15pm on Monday (A), between 11:45am-12:45pm on Tuesday (B); and between 12:15pm-1:15pm on Wednesday (C)

Spotlight Sessions: Organized by the ISPE Special Interest Groups (SIGs). Presenters should be at their posters between 12:15pm-1:15pm on Monday (A) and 11:45am-12:45pm on Tuesday (B); and between 12:15pm-1:15pm on Wednesday (C)

Spotlight sessions offer pre-selected presenters the opportunity to share their work and to discuss their results with an audience. When the spotlight session chair and audience stop at your poster, please give a brief, 3-minute, presentation and to answer questions about your research.

Monday

- Adherence
- Asian Pharmacoepidemiology Network (AsPEN)

Spotlight Session Prizes

A group of judges will select the best posters of each Spotlight Session. The best presenters will receive an invitation to display their posters for the duration of the ICPE. The winners will be announced during The Final Word session on Wednesday afternoon, August 28.

NUMBERING SYSTEM

Each poster board will be numbered. Presenters should attach their posters to the board number corresponding to the number assigned to their poster listed in the **Final Program**. The **POSTER BOARD NUMBER** is the first number listed. The **PUBLICATION NUMBER**, for use in locating abstracts in the **Final Program**, is listed after the abstract title.

217 Complementary Use of US FDA Adverse Event Reporting System and Sentinel Distributed Database to Characterize Non-Vitamin K Oral Anticoagulants Associated Cutaneous Small Vessel Vasculitis [1148]

Mohamed Mohamoud, Casie Horgan, Veronica Sansing-Foster, Elizabeth Dee, Justin Bohn, Oren Shapira, Mihaela Jason, Efe Eworuke, Monica Munoz, Danijela Stojanovic, Lois La Grenade. (United States)

218 Fluoroquinolone Use and Serious Arrhythmias: A Nationwide Case-Crossover Study [1149]

Lorenzo Porta, Meng-tse Gabriel Lee, Wan-Ting Hsu, Tzu-Chun Hsu, Chien-Chang Lee. (United States)

219 A Self Controlled Case Series of Fluoroquinolone Exposure and the Risk of Aortic Aneurysm or Dissection [1150]

Ajit A Londhe, Chantal Holy, James Weaver, Sergio Fonseca, Angelina Villasis, Daniel Fife. (United States)

220 Acetylcholinesterase Inhibitors, Cardiosuppressive Drugs, and Adverse Cardiac Events in Patients with Dementia [1151]

Izumi Sato, Isao Iwata, Edward Chia-Cheng Lai, Soko Setoguchi. (United States)

221 Concomitant Use of Dronedarone and Dabigatran is Not Associated with Increased Risk of Major Bleeding [1152]

Chuntao Wu, Rania Boiron, Juhaeri Juhaeri. (United States)

222 Hospitalization for Heart Failure among Patients Using Acridinium Bromide and Other COPD Medications: A Post-authorisation Safety Study in the CPRD [1153]

Estel Plana, Elena Rivero-Ferrer, Jaume Aguado, Nuria Saigi-Morgui, Javier Nuevo, Sami Z Daoud, Alejandra Lei, Susana Perez-Gutthann, Cristina Rebordosa. (Spain)

223 Major Bleeding Risk Associated with Oral Anticoagulant in Real Clinical Practice. A Multicentre Population-Based Prospective Cohort Study Over a Period Years [1154]

Jacques Bouget, Frédéric Balusson, Maxime Maignan, Laure Pavageau, Pierre-Marie Roy, Karine Lacut, Lucie-Marie Scailteux, Emmanuel Nowak, Emmanuel Oger. (France)

224 Heart Failure and AKI after Hospital Admission with AKI Among Patients Taking ACE Inhibitors and ARBs [1155]

Patrick Bidulka, Fotini Kalogirou, Edward Kingdon, Krishnan Bhaskaran, Liam Smeeth, Laurie Tomlinson, Dorothea Nitsch. (United Kingdom)

225 The Cardiovascular Safety of Anti-Obesity Drugs [1156]

Einat Gorelik, Ilan Matok, Boris Gorelik, Reem Masarwa, Amichai Perlman, Bruria Hirsh-Racah. (Israel)

226 Can Enzyme-Inducing AEDs and DOACs Be Co-prescribed? Assessing Concordance Between Drug Compendia for Proposed Interactions [1157]

Emily K Acton, Allison W Willis, Michael Gelfand, Scott E Kasner. (United States)

227 Celecoxib and Cardiovascular Safety: Replicating Clinical Trial Evidence from Real World Data [1158]

Ayad K Ali, Stephen P Motsko. (United States)

228 Oral Fluoroquinolones Use and Risk of Aortic Aneurysm and Dissection: A Meta-Analysis of Epidemiological Studies [1159]

Md Salman Hussain, Abul Kalam Najmi. (India)

229 Use of Drugs from the Crediblemeds® List and Risk of Sudden Cardiac Death: A Population-Based Cohort Study [1160]

Marten E Van den Berg, Katia M Verhamme, Bruno H Stricker. (Netherlands)

230 Gender Differences in the Adverse Events Induced by Cardiovascular Drugs: Using National Adverse Event Reporting and Health Insurance Database [1161]

Han-Heui Park, Dongwon Yoon, Ju Hwan Kim, Ju-Young Shin. (Korea, Republic of)

231 Risk of Bradyarrhythmia Related to Ticagrelor: A Systematic Review and Meta-analysis [1162]

Iris Pujade, Justine Perino, Clément Mathieu, Mickael Arnaud, Francesco Salvo. (France)

232 Use of Pregabalin and Worsening Heart Failure: A Nationwide Cohort Study [1163]

Marie Lund, Gry Juul Poulsen, Björn Pasternak, Niklas Worm Andersson, Mads Melbye, Henrik Svanström. (Denmark)

233 DPP-4 Inhibitors and Risk of Venous Thromboembolism: Analysis of The FDA Adverse Event Reporting System Database [1164]

Wenchao Lu, Dandan Li, Jingkai Wei, Lulu Sun, Tiansheng Wang. (China)

234 Major Cardiovascular Events in Adults on Antiretroviral Therapy in a South African HIV Management Programme [1165]

Johannes P Mouton, René de Waal, Morna Cornell, Gary Maartens, Karen Cohen. (South Africa)

235 Antiplatelet Agents and Risk of Stroke [1166]

Lamiae Grimaldi-Bensouda, Nicolas Morisot, Pegdwende O Dialla, Clémentine Nordon, Lucien Abenheim. (France)

236 A Plausible Causal Link between Antiretroviral Therapy and Increased Blood Pressure in Patients on Highly Active Antiretroviral Therapy: A Propensity Score-matched Analysis [1167]

Edmund T Nartey, Raymond A Tetteh. (Ghana)

237 Pharmacogenetic Modeling of Metformin on Stroke, Myocardial Infarction and Cardiovascular Mortality [1168]

Marten E Van den Berg, Katia M Verhamme, Bruno H Stricker. (Netherlands)

238 Association between the Risk of Venous Thrombosis and Antidepressants: A Meta-Analysis [1169]

Kiyon Rhew, Victoria Z Reams, Joshua D Brown, Almut G Winterstein. (United States)

239 Abstract Withdrawn [1170]

240 Spironolactone Reduces the Risk of Mortality and Hospitalization in Veterans with Heart Failure with Preserved Ejection Fraction [1171]

Katherine E Kurgansky, Rachel Parker, Luc Djousse, Jacob Joseph, David Gagnon. (United States)

241 Antidepressants Use and the Risk of Brain Hemorrhage [1172]

Seonji Kim, Young-Jin Ko, Bo Ram Yang, Kyoung-hoon Park, Mi-sook Kim, Byung-joo Park. (Korea, Republic of)

242 The Association between Direct Oral Anticoagulants and Gynaecological Bleeding in Women v. Standard Therapy: A Systematic Review [1173]

Sandeep Dhanda, Vicki Osborne, Saad Shakir. (United Kingdom)

243 Adverse Drug Reactions Of Antihypertensive Products [1174]

Matveev Alexandr, Krashennnikov Anatoly, Egorova Elena, Dormidor Arthur. (Russian Federation)

**Poster Session C:
Pharmacovigilance - Endocrine and Metabolism**

244 Comparative Effects of Sodium-glucose Cotransporter 2 Inhibitors on Serum Electrolyte Levels in Patients with Type 2 Diabetes: A Network Meta-Analysis of Randomized Controlled Trials [1175]

Huilin Tang, Qi Dai, Jingjing Zhang, Yiqing Song. (United States)

245 Antipsychotic Dose and Weight Gain: Long-Term Evidence from a Retrospective Study Using Electronic Health Records [1176]

Juan Carlos Bazo-Alvarez, Tim P Morris, James R Carpenter, Joseph F Hayes, Irene Petersen. (United Kingdom)

246 Comparative Risk of Polycystic Ovary Syndrome in Young Female Patients Newly Initiating Anti-psychotic Medications [1177]

Ying-Shan Chung. (Taiwan)

247 Impact of Levothyrox Formulation Change on Health and Healthcare Use in France [1178]

Sandrine Colas, Marion Bertrand, Clara Bouche, Lise Duranteau, Mathilde Francois, Vanessa Pauly, Elisabeth Polard, Mahmoud Zureik, Rosemary Dray-Spira. (France)

248 The Association between Receptor Affinity and Metabolic Side Effects Profile of Antipsychotics and Major Adverse Cardiac and Cerebrovascular Events: A Case/Non-Case Study in VigiBase [1179]

João Pedro Aguiar, Filipa Alves da Costa, Ana Paula Martins, Toine Egberts, Hubert G Leufkens, Patrick Souverein. (Portugal)

249 Identifying Type 2 Diabetes Patients at Risk for Hypoglycemic Events: Dealing with Class Imbalance [1180]

Stijn Crutzen, Sunil Belur Nagaraj, Katja Taxis, Petra Denig. (Netherlands)

250 Abstract Withdrawn [1181]

251 Antidepressant-Induced Hyponatremia: A Pharmacoepidemiological-Pharmacodynamic Analysis of Suspected Adverse Drug Reactions Reported to The US FAERS Database [1182]

Faizan Mazhar, Marco Pozzi, Marta Gentili, Emilio Clementi, Sonia Radice, Carla Carnovale. (Italy)

252 Hyperkalemia Risk with Spironolactone in Patients with Heart Failure Using Loop Diuretics [1183]

Alex Secora, Jung-Im Shin, Yao Qiao, G Caleb Alexander, Josef Coresh, Morgan Grams. (United States)

253 Monitoring the Safety of Exenatide Once-Weekly (Bydureon®) in Primary Care in England: Results from a PASS [1184]

Sandeep Dhanda, Vicki Osborne, Debabrata Roy, Saad Shakir. (United Kingdom)

254 Incidence and Risk Factors for Hypoglycemia in Patients with Diabetes Hospitalised in a Quaternary Care Centre in South India [1185]

Jeeva Joseph, Suja Abraham. (India)

255 Incretin Mimetic Drugs (GLP-1 Receptor Agonists and DPP-4 Inhibitors) and Associated Adverse Events and Renal Outcomes: A Pharmacoepidemiologic Analysis Using The FAERS Database [1186]

Hamza Alshannaq, Jeff Jianfei Guo. (United States)

256 Diabetes Management Protocol: Impact In The Incidence of Hypoglycemia [1187]

Suja Abraham. (India)

257 Risk and Signals of Ketoacidosis among Sodium-Glucose Cotransporter-2 (SGLT2) Inhibitors: Analysis of Post Marketing FDA Adverse Event Reporting System (FAERS) Database, 2013-2018 [1188]

Thamir M Alshammari, Maram A Al-Otaiby, Fatemah A Anofal, Khaledah A Alenazi. (Saudi Arabia)

**Poster Session C:
Pharmacovigilance -
Gastrointestinal and Liver**

258 Pancreatic Safety of Sodium-Glucose Co-Transporter 2 Inhibitors in Patients with Type 2 Diabetes: A Systematic Review and Meta-Analysis [1189]

Huilin Tang, Keming Yang, Aihua Wang, Xin Li, Yiqing Song, Jiali Han. (United States)

259 Acute Pancreatitis Associated with Opioid Use: A Nested Case-Control Study [1190]

Iris Pujade, Francesco Salvo, Anne-Marie Castilloux, Audrey Béliveau, Yola Moride. (France)

260 Cinacalcet Use and Risk of Gastrointestinal Bleeding in Secondary Hyperparathyroidism Patients Receiving Maintenance Hemodialysis [1191]

Tzu-Chieh Lin, Haifeng Guo, Paul Dluzniewski, Yi Peng, Dave Gilbertson, Brian Bradbury, Kimberly Nieman, Michael Sprafka, Jiannong Liu. (United States)

261 Measuring the Risk of Liver Injury in UK Primary Care Patients Prescribed a Second Course of Flucloxacillin: A Cohort Study Using the Clinical Practice Research Datalink (CPRD) [1192]

Patrick Bidulka, Ian Douglas, Louise Pealing, Kevin Wing. (United Kingdom)

262 Main Drug Classes Dispensed Prior to Hospital Admission for Acute Liver Injury [1193]

Adeline Grolleau, Stephanie Duret, Nicolas Thurin, Mai Duong, Regis Lassalle, Patrick Blin, Sinem-Ezgi Gulmez, Nicholas Moore. (France)

263 Antibiotic Exposure Prior to Hospital Admission for Acute Liver Injury [1194]

Adeline Grolleau, Stephanie Duret, Nicolas Thurin, Mai Duong, Regis Lassalle, Patrick Blin, Cecile Droz, Sinem-Ezgi Gulmez, Nicholas Moore. (France)

264 Antidepressant and Anxiolytic-Hypnotic Exposure Prior to Hospital Admission for Acute Liver Injury [1195]

Adeline Grolleau, stephanie Duret, Nicolas Thurin, Mai Duong, Regis Lassalle, Patrick Blin, Cecile Droz, SinemEzgi Gulmez, Nicholas Moore. (France)

265 Abstract Withdrawn [1196]

266 Drug-induced Liver Injury Associated with Antituberculosis and/or Antiretroviral Therapy: A Case Series from a Prospective Registry in The Western Cape, South Africa [1197]

Hannah M Gunter, Shaazia Allie, Annemie Stewart, Munir Pirmohamed, Karen Cohen. (South Africa)

267 A Multifactorial Algorithm to Automate Screening of Drug-Induced Liver Injury Cases in Clinical and Post-marketing Settings [1198]

Osman Turkoglu, Ritu Gupta, Alvin Estilo, Liliam Pineda Salgado, Rajesh Pandey, Mirza Rahman. (United States)

268 Analysis of 172 Cases with Drug-Induced Liver Injury between 2017 and 2018 in a General Hospital in Central China [1199]

Hong Cheng, Wannan Yan. (China)

269 Proton Pump Inhibitors vs Histamine-2 Receptor Antagonists and Risk of Mortality in Critically Ill Patients - A Pilot Analysis of Multi-institutional Study [1200]

Hsing-Chun Hsieh, Tsung-Hsuan Lin, Mei-Chuan Lee, Hui-Chen Su, Shih-Chieh Shao, Chien-Chou Su, Edward Chia-Cheng Lai. (Taiwan)

270 NSAID and Analgesic Exposure Prior to Hospital Admission for Acute Liver Injury [1201]

Nicholas Moore, Adeline Grolleau, Stephanie Duret, Nicolas Thurin, Mai Duong, Regis Lassalle, Patrick Blin, Sinem Ezgi Gulmez, Cecile Droz-Perroteau. (France)

Poster Session C: Pharmacovigilance - Infections

271 Rates and Predictors of Post-Surgical Infections for Common Surgical Approaches [1202]

Abhishek S Chitnis, Katherine Corso, Zhenna Huang, Piyush Nandwani, Chantal E Holy. (United States)

272 The Role of Sleeping Pills in the Development of Shingles in Veterans [1203]

Pragati Ghimire-Aryal, Skai W Schwartz, Darren Scheer, Kenneth Taylor, Yuri Sebastião, W McDowell Anderson, Philip R Foulis. (United States)

273 Medication Related Problems and Associated Risk Factors among HIV/AIDS Patients on Antiretroviral Therapy at a National Referral Hospital in Kenya: A Cross-sectional Study [1204]

Sylvia Opanga, Peris W Thuo. (Kenya)

274 Medication Related Problems Among HIV/AIDS Patients on Antiretroviral Therapy at a National Referral Hospital in Kenya [1205]

Sylvia Opanga, Peris Wambui Thuo. (Kenya)

275 Rare Adverse Effects Analysis of New Generation Hepatitis C Medications Using EMR and FAERS Data [1206]

Chongliang Luo, Xinyuan Zhang, Liu Yang, Jingcheng Du, Jiayi Tong, Jing Huang, Cui Tao, Yong Chen. (United States)

276 Tenofovir-Associated Renal Toxicity in a Cohort of HIV-infected Patients in Ghana [1207]

Edmund T Nartey, Raymond A Tetteh. (Ghana)

Poster Session C: Pharmacovigilance - Respiratory

277 The Effects of Amoxicillin on Acute COPD Exacerbations in the Outpatient Setting: A Retrospective Cohort Study Based on Real-World Data [1208]

Yuanyuan Wang, Jens H Bos, Catharina C Schuiling-Veninga, Bob Wilffert, Eelko Hak. (Netherlands)

278 Risk of Interstitial Lung Disease among Patients Treated for Atrial Fibrillation with Selected Anti-Arrhythmic Drugs in Two Healthcare Databases [1209]

Arlene K Tave, Earl Goehring, Vibha Desai, Chuntao Wu, Rhonda Bohn, Sally Tamayo, Nicholas Sicignano, Juhaeri Juhaeri, Judith K Jones, Sheila Weiss. (United States)

279 Risk of Developing Chronic Obstructive Pulmonary Disease or Lung Cancer in Smokers Taking Enzyme-Inducing Antiepileptic Drugs [1210]

Daphne Reinau, Anne Leuppi-Taegtmeier, Susan S Jick, Christoph R Meier. (Switzerland)

Poster Session C: Propensity Scores

280 A Comparison of Outcome-Related Diagnostics for Propensity Scores [1211]

Emily Granger, Jamie C Sergeant, Mark Lunt. (United Kingdom)

281 A Systematic Review of the Use of Propensity Scores in Cardiovascular Literature [1212]

Julie Rouette, Michelle Samuel, Brice Batomen, Joanne Kim, Robert W Platt, James Brophy, Jay S Kaufman. (Canada)

282 Comparisons of Propensity Score-based Estimates in the Presence of Treatment Effect Modification [1213]

M Sanni Ali, Daniel Prieto-Alhambra, Ian Douglas, Liam Smeeth. (United Kingdom)

283 Propensity Score Matching with Bootstrapping and "Divide and Recombine" Approaches in Huge Data [1214]

Gabriela Lima Borges, M Sanni Ali, Mauricio L Barreto, Liam Smeeth, Rosemeire Leovigildo Fiaccone. (Brazil)

284 Improving Confounder Adjustment: Translating High-Dimensional Propensity Score Principles to United Kingdom Electronic Health Records [1215]

John Tazare, Liam Smeeth, Stephen J Evans, Elizabeth Williamson, Ian J Douglas. (United Kingdom)

285 Evaluation of Observational Study Data with Multi-level Propensity Scores: The Planning Process [1216]

Mary E Ritchey, Mary Anne Armstrong, Shannon Hunter, Jiaxiao M Shi, Darios T Getahun, Fagen Xie, Christoph Dierig. (United States)

286 Deep Learning-Based Propensity Score Computation: Cohort Study in Second Line Treated Advanced Non-small Cell Lung Cancer (ANSCLC) Patients [1217]

Janick Weberpals, Tim Becker, Fabian Schmich, Dominik Rüttinger, Fabian Theis, Anna Bauer-Mehren. (Germany)

Improving the health of humans and animals...

... is the goal of the research-driven pharmaceutical company Boehringer Ingelheim. The focus in doing so is on diseases for which no satisfactory treatment option exists to date. The company therefore concentrates on developing innovative therapies that can extend patients' lives. In animal health, Boehringer Ingelheim stands for advanced prevention.

Family-owned since it was established in 1885, Boehringer Ingelheim is one of the pharmaceutical industry's top 20 companies. Some 50,000 employees create value through innovation daily for the three business areas human pharmaceuticals, animal health and biopharmaceuticals.

The department Global Epidemiology, Real World Evidence- Center of Excellence contributes substantially to achieving these goals by evaluating patient populations and our products in real world settings and is currently expanding.
